

Managed printer

Printer pool design and operation

T-Systems

Printing, faxing, scanning and copying can generate high costs for a company. T-Systems' managed printer service offers a solution for reducing the costs of these activities and for full-scale management of devices. The service includes design, installation and operation of the whole printer pool, the devices needed for the operations, their replacement and continuous monitoring. As a result of continuous maintenance fault occurrence can be reduced or prevented.

This service enables simultaneous cost reduction and efficiency improvement in the field of printing.

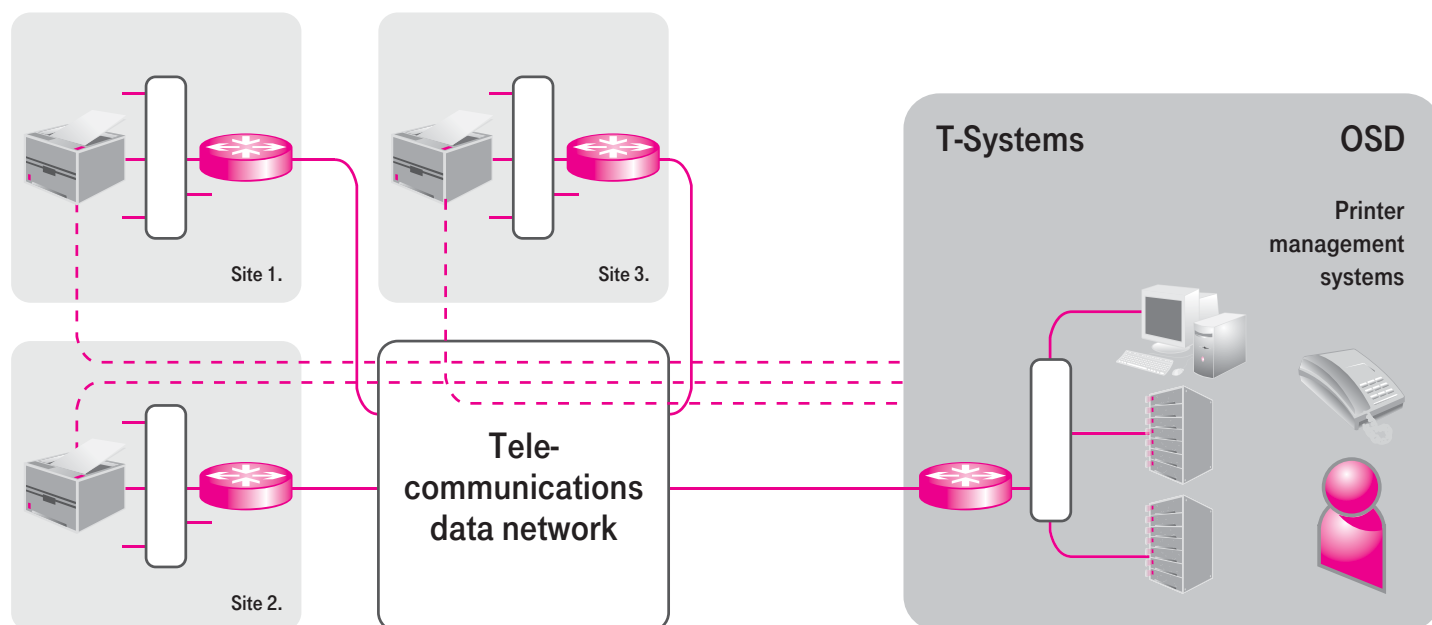

Who can benefit from the T-Systems Managed printer service?

- Primarily companies having a larger number of printers where the use of such printers is essential for the operation of the company.
- SMEs where optimal use of space is important, because the use of multifunctional devices releases space in the offices.

Benefits gained with the use of the service

- Foreseeable and traceable printing costs.
- As a result of design and optimization the location and number of printers can be exactly determined.
- Printing related administrative burden is reduced.
- As a result of more efficient utilization, printing costs are reduced.
- More up-to-date printers and the latest technology are available to our customers without high upfront investment.
- Simpler maintenance processes.
- With optimized operation, environmental pollution is reduced.

Functioning of the service
