## **They serve their customers from the most modern environment: New site of T-Systems Magyarország has been commissioned**

**Debrecen branch of T-Systems Magyarország has moved to a new building equipped with the highest-speed infocommunications network and meeting all requirements of the 21st century. The office block was inaugurated by dr. László Papp, mayor of Debrecen and Zoltán Kaszás, chief executive officer of T-Systems Magyarország Zrt.**

T-Systems used to operate in three distant sites in Debrecen; in the new building, all colleagues perform their work in the same location. The office block is located in a frequented part of the Debrecen industrial park, currently a total of 45 employees work in an area of more than 700 sqm. Number of the workstations can be extended, and full obstacle clearance of the building is currently in progress. The modern office environment is equipped with the reference systems that are offered to the clients as well, infocommunications systems of the building have been implemented by the employees of T-Systems Hungary. External and internal security technology systems perfectly tailored for the building were installed by the experts of the company, the state-of-the-art video surveillance system is served by 27 cameras. In the building there are four meeting rooms with video-conference capabilities, named after famous people of Debrecen, and the comfortable working environment is ensured by an 'activity room' as well.

In the inauguration ceremony, mayor dr. László Papp told that T-Systems Magyarország and Debrecen have already implemented successful cooperation projects in a number of areas to foster integrated and innovative development of the city. The new site, with all of its available services consolidates regional role of the company; the office building can be a good example for other companies, as well with respect to the utilization of the industrial park.

Chief executive officer Zoltán Kaszás emphasized that the role of T-Systems Magyarország in Debrecen and the region will further increase, for which the new site provides a firm basis. Regional service area of the company extends to Hajdú-Bihar, Szabolcs-Szatmár-Bereg, Jász-Nagykun-Szolnok Counties, as well as the southern part of Pest County. "We have participated in several projects of local and national significance in Debrecen, including among other the areas of transport, finances and health care. Nevertheless, we consider it important to stay close to our clients, with the new site we can introduce to our clients also solutions that can be applied in their work environments, as well." - he added
